

# Smart Recycling

Creating value from waste timber and pallets through recycling & re-use

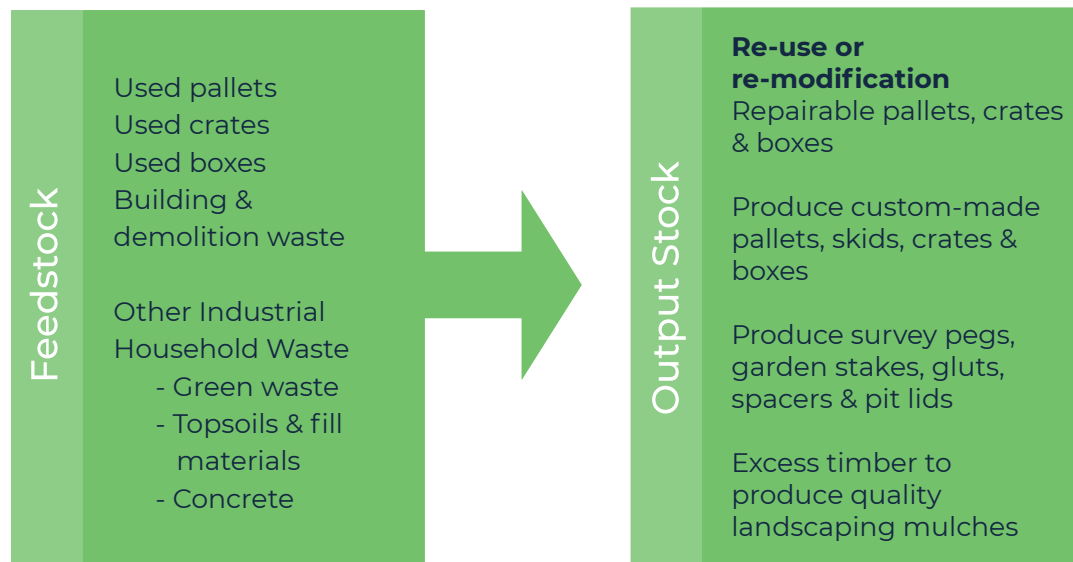

Almost every manufacturer deals with the problem of waste timber in the form of pallets.

These are troublesome, as they are difficult to dispose of without taking up costly space in the waste to landfill bin, while they take up valuable space if stored on site.

## Our Solution

## The Benefits

- ✓ SMEs save money on pallet and box purchases
- ✓ Demand for re-used material
- ✓ Environmentally friendly re-manufactured solutions save energy
- ✓ Mitigates the rising costs of landfill disposal timber/pallet waste
- ✓ Create a sustainable cycling loop

**1 tonne** of repaired pallets = **0.7 tonne** of reduced CO<sub>2</sub> emissions + **1 tonne** diverted from landfill
